

Telemetry Variable	Target Node	Monitored Metric	Operational Target / Range	Remediation Dynamic
attn_context_load	N01_SCRATCH	Active token utilization	Less than 80% capacity	Offload stale context tokens to N03_SILENT
gate_open_rate	N02_GATE	Percentage of disinhibited tokens	5% to 15% of stream	Adjust striatal sensitivity threshold
energy_delta	N05_ATTRACT	Modern Hopfield convergence	Less than 10^-5 in 2 steps	Raise inverse temperature beta
ppr_entropy	N07_GRAPH	Stationary probability dispersion	Flat distribution warning	Re-prune generic entity stopwords
surprise_magnitude	N09_SURPRISE	Reconstruction loss gradient norm	0.05 to 0.40 nominal	Trigger N08_TITANS write when exceeding 0.60
drift_divergence	N10_PARAM	KL divergence from teacher network	D_KL less than 0.02	Increase consolidation penalty lambda
edit_neighborhood_error	N14_SURGERY	Performance shift on adjacent entities	Zero variance allowed	Regularize covariance matrix C
